## We Robot 2026 Programme

We Robot is heading to Europe! Join us for the next We Robot conference in Berlin, Germany.

We are excited to announce the preliminary programme for the 14<sup>th</sup> annual We Robot Conference to be held on 24 and 25 April 2026, with a pre-conference workshop on 23 April 2026. The final conference programme will be available on March 19, 2026, following the final paper submission deadline.

### Pre-Conference Workshop: 23 April

**Morning session 09.00-11.30:** Diving into the future at the House of Robotics, where cutting-edge research is rewriting what machines can do.

Location: [House of Robotics](#)

**Afternoon session 13.00-17.30:** Get ready to roll up your sleeves! Workshop activities will dive deep into the conference's themes — agentic AI, robot ethics, and beyond — before crowning the ultimate robot knowledge champion in a fierce Robot Trivia face-off.

Location (Afternoon session): [Wikimedia Deutschland](#)

### Conference: 24-25 April

Location: [buM – Place for Solidarity](#) at the heart of urban Berlin

Across two enriching days, the conference programme is structured around individual paper presentations and panel discussions, designed to facilitate meaningful dialogue and foster engagement across disciplinary boundaries. And because the best conversations don't always happen in the conference room, join us for the conference dinner on the 24<sup>th</sup> where the energy, ideas, and good company keep flowing long into the evening.

**Day 1- 24 April 2026**

09:00-09:30 | Welcome

09:30-10:30 | Paper Session

- Reimagining the Three Laws of Robots: Ethical Principles from Field Deployment for Adaptive Governance  
**Authors: Tomomi Ota (Shiga University) and Rikiya Yamamoto (Robot Friendly Project)**

10:30-11:00 | Break

11:00-13:00 | Panel: Building Systems That Last: Law, Technology, and Long-Term Thinking

- The Charge of Green Robots: From Environmental Robot Ethics to an Environmental Rule of Law for Robotics  
**Authors: Jacopo Ciani, Ugo Pagallo, Massimo Durante and Ludovica Paseri (Department of Law, University of Turin)**
- When Right to Repair Meets AI: Reinterpreting the Right to Repair through Individuation  
**Author: Ryota Akasaka (The University of Osaka)**
- Robotic Imposters with Human Helpers: An anthropologically informed study of sociotechnical imaginaries around social robots in staged and unstaged settings in Japan  
**Authors: Elsa Concas (Stockholm University), Laetitia Tanqueray (Department of Technology and Society, Lund University) and Stefan Larsson (Department of Technology and Society, Lund University)**

13:00-14:00 | Lunch

14:00-15:00 | Paper Session

- From Limited Risk to Prohibited Use: Mapping the EU AI Act's Risk Framework onto Robotic Public Safety Systems.  
**Author: Irmak Erdogan (KU Leuven Centre for IT & IP Law)**

15:00-15:30 | Break

15:30-17:30 | Panel: Reimagining Accountability: Who Answers When Systems Fail?

- Intention, But Hybrid: A New Test for Posthuman Agents  
**Author: Janko Munjić (Appellate Court in Kragujevac; Faculty of Law, University of Kragujevac)**
- AI Risk Bonds: A Market-Based Mechanism for Governing Liability  
**Authors: Gleb Papyshv (Lingnan University), Sara Migliorini (University of Macau) and Keith Jin Deng Chan (The Hong Kong University of Science and Technology)**
- Curated Information Frameworks: Contextual Transparency and Governance for Dynamic AI  
**Author: Emily LaRosa (Michigan State University)**

**Day 2 – 25 April 2026**

09:30-10:30 | Paper Session

- Rethinking Robot Ownership: Comparing Public, Corporate, and Private Ownership Models.  
**Authors: Isaac Sheidlower, Tomo Lazovich, Harini Suresh, and Serena Booth (Brown University)**

10:30-11:00 | Break

11:00-13:00 | Panel: AI Safety and assurance: Technological foundations, standards and audits

- Protocols as Custom: A Case for Negligence in Agentic Artificial Intelligence  
**Authors: Veronica Paternolli (University of Verona) and Ryan Calo (University of Washington)**
- Revealing AI's Latent Rulebook  
**Authors: David Atkinson (Georgetown) and Paul Ohm (Georgetown Law)**
- A Scoping Review of System Integration Audits: Towards a New Class of Artificial Intelligence Evaluation  
**Authors: Leah Davis (McGill University), Ajung Moon (McGill University) and Dominic Martin (Université du Québec à Montréal (UQAM))**

13:00-14:00 | Lunch

14:00-15:00 | Paper Session

- From Rejection to Regulation: Mapping the Landscape of AI Resistance  
**Authors: Ayse Gizem Yasar (École normale supérieure Paris) and Can Simsek (Alexander von Humboldt Institute for Internet and Society)**

15:00-15:30 | Break

15:30-17:30 | Panel: Deep Fakes and Deeper Problems: AI's Problem with Nuances

- Ambiguity Collapse & LLMs  
**Author: Shira Gur-Arieh (Harvard Law School)**
- How Much Is My Voice Worth to an Algorithm? Synthetic Voices, Embodied Agents, and the Right to Freedom from Vocal Identity Confusion  
**Author: Maddalena Castellani (Attorney-at-law and Independent Researcher)**

If you have any questions, please email [orga@werobot2026.eu](mailto:orga@werobot2026.eu). We look forward to seeing you at the conference!

We Robot 2026 Team

## ACKNOWLEDGEMENTS

### PROGRAMME COMMITTEE

Benjamin Brake (former Head of Unit, Federal Ministry of Digital Affairs)  
Lee Andrew Bygrave (University of Oslo)  
Ryan Calo (University of Washington)  
Mila Dalla Preda (University of Verona)  
Kate Darling (RAI Institute)  
Jan deBruyne (KU Leuven)  
Suzie Dunn (Dalhousie's Schulich School of Law)  
Martin Ebers (RAILS)  
Eduard Fosch-Villaronga (Leiden University)  
Michael Froomkin (University of Miami)  
Sabine Gless (University Basel)  
Sue Glueck (Independent Scholar)  
Nikolas Guggenberger (University of Houston)  
Woodrow Hartzog (University of Boston)  
Maximilian Kiener (TU Hamburg, Institute for Ethics in Technology)  
Natalie Leesakul (University of Nottingham)  
Jason Millar (University of Ottawa)  
Laurel Riek (UC San Diego)  
Hannah Ruschemeier (University of Osnabrück)  
Giovanni Sartor (University of Bologna)  
Burkhard Schafer (University of Edinburgh)  
Bill Smart (Oregon State University)  
Katie Szilagyi (University of Manitoba)  
Helena Webb (University of Nottingham)  
Stanislaw Tosza (University of Luxembourg)

### HOSTING ORGANISATION

**RAILS.**  
Robotics & AI Law Society

SPONSORS AND ACADEMIC PARTNERS

UNIVERSITY of WASHINGTON

UNIVERSITY OF OSLO

Stifterverband's Learning Platform for Artificial Intelligence
